

# SAS Stand & Tripods

## The Portable Microbial Air Sampler for Cleanroom Monitoring

The SAS range has been at the fore front of environmental monitoring for over 40 years. The distinctive yellow samplers are used by many of the world's leading pharmaceutical companies to demonstrate GMP compliance within their manufacturing facilities.

To improve user experience and aid use of the samplers, a range of tripods and stands are available. These allow users to place the sampler close to the critical point, such as point-of-fill, during sampling and so obtain a more representative air sample.

### Applications

The SAS stands and tripods are available for both the standard SAS Super 100/180 as well as the twin headed SAS Super Duo 360 and can be used for many environmental monitoring applications, the key uses are:

- **Routine cleanroom monitoring**
- **Grade A critical point monitoring**
- **Operating theatres**
- **General environmental monitoring**

### Features & Benefits

#### SAS stand

The stainless-steel SAS Stand is a robust tabletop stand to aid stability of your sampler during use and reduce the risk of it being knocked over. Fitting to the sampler is quick and easy via a wing nut which is attached to the tripod fitting.

#### SAS arm support

The SAS arm support is a stainless-steel wall mount fitting. It features a quick fitting allowing the SAS to be easily fitted and removed when required.

#### SAS tripod - standard

The sturdy 'camera' tripod is an easy to use, adjustable mount for the SAS air sampler. Extending to 1.44m in height, it features a quick release shoe fitting and folds neatly away for easy transportation.
