Prepared Media

We use a batch manufacturing process which is fully documented at all stages of production. Each batch of media is subjected to a full array of QC tests including comprehensive growth tests. The QC results are reported in detail on the Certificates supplied for each batch.

All our prepared media products are manufactured and tested at our site in Bicester, Oxfordshire under the control of our ISO9001 approved quality management system.

We aim to provide an efficient and flexible service, offering high quality products that meet or exceed the needs of our customers.

Our product range is comprehensive and includes Petri dishes - 55mm, 90mm and 140mm plus contact plates. An extensive range of irradiated media is also listed plus bottled broths, agars and diluents and broth in bags and ampoules.

Tailored Solutions

If you have a specific requirement which is not listed, please contact us. Our flexible manufacturing processes allow us to offer tailored solutions, including special packaging variations.

Ordering Information

We welcome the establishment of Standing Orders, which are fully flexible, so that deliveries can be pre-scheduled. For ad-hoc orders we will propose a date of delivery, dependent on the lead time of the products ordered. Orders can be placed by telephone, e-mail or post.

New Products

Redipor® Beta Bag

The purpose of the Redipor® Beta Bag is to ensure the safe transfer of ready-to-use gamma-irradiated prepared media, into your sterile manufacturing environment, while reducing risk, cost, and time.

New Code	Description	Qty/Pack	Pks/Case	Price/Case
Redipor Beta Bag				
5.0809	Irradiated Tryptone Soya 2% Agar + Neutraliser No.4 90mm Petri dish single vent clear expiry date 27ml fill. Flow wrap + label. Sleeve of 10.	1	10	1380.00
5.0810	Irradiated Tryptone Soya 2% Agar + Neutraliser No.4 55mm Contact plate triple vent clear expiry date 17ml fill. Flow wrap + label. Sleeve of 10.	1	10	1370.00
5.0818	Irradiated Tryptone Soya Agar 90mm Petri dish single vent clear 18ml fill. Flow wrap + label. Sleeve of 10.	1	10	1430.00
5.0819	Irradiated Tryptone Soya 1.6% Agar + Neutraliser No.4 55mm Contact plate triple vent clear 17ml fill. Flow wrap + label. Sleeve of 10.	1	10	1350.00

Redipor® Plastic Bottles

Redipor plastic bottles are not only tougher than glass, but also lighter in weight. The plastic also has a lower temperature requirement for recycling compared with glass. Use of plastic bottles also reduces the possibility of breakages, which contributes to a downturn in waste. These factors make Redipor plastic bottles a more environmentally friendly alternative that contributes to your sustainability initiatives.

New Products

Redipor® Prepared Media 5 Plate Pack

Reducing waste can help limit environmental impact. For example, consumable pack size can be tailored more closely to specific usage needs. Providing plated media in 5's, rather than the industry standard of 10's, helps support reducing waste and costs.

New Code	Description	Qty/Pack	Pks/Case	Price/Case

Terms & Conditions of Supply

Availability of Stock Items: All products listed in our price list are subject to availability. We strive to keep sufficient stock of items listed, but occasionally, due to high demand or other unforeseen circumstances, an item may be temporarily out of stock. On these rare occasions, speak to the team and we might have another suitable alternative product available.

Minimum Order Quantity: The minimum order for fresh prepared media is 0.5 litres for any one medium, equivalent to 2 packs of 10 plates. For bottled media and irradiated media the minimum order is for one case of any one type.

Packaging: (a) Fresh Petri dishes and contact plates are packed as 10 plates (140mm Petri dishes in 5's) in single flow wrap film or polythene bag.

(b) Irradiated Petri dishes and contact plates are packed as above (a) (triple wrap has a second layer on each pack of 10) and then either 15, 10 or 6 packs are boxed in a carton with a polythene liner bag. Alternative presentations are available on request.

(c) Bottled media are shrink wrapped into trays in the quantities shown for each bottle type.

Labelling: (a) Each plate is ink jet printed with an abbreviated description of agar type and batch number. A printed self-adhesive label is added to the first layer of packaging and shows Description, Code No, Batch No, Use By Date, Date of Manufacture and Storage Conditions. This information plus quantity is repeated on the box label for irradiated media.

(b) All bottles are individually labelled with the same information as detailed in (a). A label is also added to each pack of bottles and includes quantity.

Testing: All media are subjected to a sterility test, pH test and growth promotion test in our own QC laboratory using a standard set of type cultures.

Storage: We recommend that our prepared media products are stored between 10 and 25°C (some exceptions apply) and are not subjected to significant temperature fluctuations. This will help avoid the formation of condensation in the plates.

Shelf Life: All packs of plates and bottles are labelled with 'Date of Manufacture' and a 'Use By' date, which is only applicable when stored as recommended and provided the wrapping of each individual pack is intact and the bottle has not been opened. On visual inspection the media should also appear satisfactory.

Delivery: Carriage is not included and will be charged. As far as possible, Standing Orders will be despatched on the same day each week / fortnight / month.

VAT: Not included and will be added to all invoices at the ruling rate.

Price Changes: We reserve the right to amend prices without prior notice and to invoice at the current price. All prices shown are in Pounds Sterling. E & OE.
